Endless Possibilities
We introduced our very first centrifuge in 1964 as an integral part of the Eppendorf Microliter System, and revolutionized laboratory practices worldwide. To this day, the Eppendorf name remains synonymous with creative design, innovative technology, and reliable performance that stand the test of time.

The Eppendorf approach to product development is about listening to our customer’s needs, understanding daily laboratory routines, and anticipating future trends. The result is a comprehensive line of microcentrifuges that serve the multiple applications you encounter in your lab – whether you just have to spin a few tubes at a time or need the extra versatility for handling plates and larger volume tubes directly on your lab bench.

Our goal is to provide you with a product solution that not only leaves you thoroughly satisfied but that is also fun to work with. That is why Eppendorf microcentrifuges are designed to go beyond speed and capacity to offer you unparalleled ergonomic operation and superior temperature management. You will not only experience enhanced performance, but also exceptional joy in their use.

With this sound fundamental experience Eppendorf is proud to serve you as your expert partner in microcentrifugation.

Meet the Next Generation in Microcentrifugation
Ergonomic Operation

To make your daily routines faster and easier we strongly focus on the ergonomic aspects of our products. Today Eppendorf microcentrifuges set the standards in terms of design and user-friendliness. These key success factors have also been awarded the »excellent! Universal Design« certificate of the TÜV Nord organization.

Virtually silent operation
Eppendorf centrifuges are designed for whisper quiet operation to benefit your work environment – you can work right next to them while they are running.

Soft-touch lid closure
All our centrifuges are equipped with a soft-touch one-finger lid closure. Just lower the lid gently and it will lock automatically. No more pressing or slamming down the lid.

Intuitive operation
Large, full-digit displays, and intuitively labeled keys make operation super simple.

Eppendorf QuickLock® rotors
Our aerosol-tight Eppendorf QuickLock rotors close with only ¼ of a turn. This not only saves you time but also takes repetitive stress off your wrist.
Entry-level centrifuges
Powerful and easy-to-use MiniSpin and MiniSpin plus microcentrifuges are small enough so that each workstation can be equipped with a »personal« centrifuge.

Centrifuge 5425

This 24-place centrifuge has been engineered to be extremely quiet. Short runs up to 12 minutes are whisper quiet at an average of 45 dB(A). This is sufficient for centrifugation steps of most routinely used DNA/RNA purification kits. During longer runs the cooling fan works at full capacity to dissipate the heat for the remainder of the run. Centrifuge 5425 is the successor of the legendary Centrifuge 5424. It has everything you loved before plus great new features to make everyday work more enjoyable.

**Product features**
> Whisper quiet microcentrifuge for stress-free work
> Aerosol-tight Eppendorf QuickLock® lids for simple and safe handling
> Outstanding software features (e.g. 10 acceleration and braking ramps, 3 program buttons, short function without continuous pressing of the key)
> Extended rotor program (e.g. 5.0 mL rotor, swing-bucket rotor for PCR strips)
> OptiBowl® design for quiet operation, even without a rotor lid
> Soft-touch one-finger lid closure for ergonomic operation
> Automatic lid opening at the end of the run – prevents sample warming and allows easy access to samples
> Max. rotor capacity: 10 x 5.0 mL vessels
> Max. speed: 21,300 x g (15,060 rpm)

Centrifuge 5430/5430 R

Microcentrifuge with multipurpose capabilities
Unique cross-over Centrifuges 5430 and 5430 R combine the best features of a microcentrifuge (small footprint) and multipurpose centrifuge (versatility) in one instrument. These centrifuges spin rotors for Eppendorf Tubes and PCR strips as you would expect from any microcentrifuge. But that’s not all. In a compact size, Centrifuges 5430 and 5430 R also accommodate a fixed-angle rotor for 15/50 mL conical tubes, Vacutainer®, 10 to 50 mL OakRidge tubes, cryo vials as well as a swingbucket rotor for MTP and PCR plates. Until now, this has only been possible with large multipurpose centrifuges.

Product features
> Capacity: 48 × 1.5/2.0 mL, 6 × 50 mL, 2 × MTP
> Speed up to 30,130 × g (17,500 rpm)
> Soft-touch closure for ergonomic operation
> Menu-driven, multilingual operation menu (English, German, French, Spanish) with large backlit display
> Saves up to 50 user-defined programs – 5 program keys for easy access to routine programs

Additional features of refrigerated Model 5430 R
> Temperature range from –11 °C to 40 °C
> FastTemp program for fast pre-cooling and maximum temperature accuracy inside the rotor
> ECO shut-off can be programmed to engage after 1, 2, 4 or 8 hours of nonuse for up to 84% energy savings and extended compressor life
Easy Pre-cooling with FastTemp pro®

In addition to the standard FastTemp pre-cooling program Eppendorf Centrifuge 5430 R features a unique software option called FastTemp pro. This program allows for automated pre-cooling based on pre-programmable time and date. FastTemp pro can be set to a specific date or as a repetitive event during several days every week. Simply turn the centrifuge into standby mode when you leave your lab and let FastTemp pro take care of pre-cooling in the morning. This not only makes operation super easy, it also saves you up to 90% of energy over night.

![Energy savings overnight with ECO shut-off and FastTemp pro](image)

**Up to 90% energy savings with FastTemp pro**

Energy savings of ECO shut-off (with 8, 4, 2, and 1 hour setting) and FastTemp pro compared to continuous overnight cooling (17 hours).

A System Striving for Perfection

Eppendorf has always listened to customers and worked together with them on improving existing workflows. Since 1964 Eppendorf is offering system solutions that make everyday lab routines faster and easier. Whether it is spinning down samples, transferring liquids, storing samples at –80°C, or incubating them at up to 100°C, the perfect combination of Eppendorf instruments, Eppendorf Tubes®, plates and pipette tips will help you to excel your results and give you the best working experience possible.

High-speed centrifuge rotors and high centrifugation resistance of our tubes allow you to get your results even quicker.

Adapters for most common swing-bucket and fixed-angle rotors make it easy to integrate the Eppendorf Tubes into existing centrifuges.

Optimized thermoblocks guarantee accurate temperature control and efficient mixing in Eppendorf ThermoMixer® and MixMate®.

For sample preparation and storage, we offer the ideal racks and boxes for our Eppendorf Tubes.

Broad range of pipettes from 0.1 µL to 10 mL. The complementary set of epT.I.P.S.® allows for stress-free and contamination-free work.

A broad range of adapters make for easy integration into our automated pipetting system epMotion®
Eppendorf Tubes® 0.5/1.5/2.0 and 5.0 mL

The perfect addition
Eppendorf Tubes combine all the experience from 50 years of constant improvement and development. The original Eppendorf Tube gives you outstanding stability during centrifugation, perfect sealing and evaporation protection.

Product features
> Hinged lid of Eppendorf Safe-Lock tubes prevent accidental lid opening during incubation
> High centrifugation resistance (up to 30,000 × g) prevents tube breakage
> Precise lid sealing for lowest evaporation rates during storage
> Manufactured free from slip agents, plasticizers, and biocides – substances that have been shown to leach from plastic consumables into the sample and negatively affect assay results
> Available in Protein and DNA/RNA LoBind quality
